Art Unit: 2872

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In claim 11, line 5, the language "the polarization" has been changed to read --a polarization--.

Claims 8 and 18 have been canceled.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest a chromatic dispersion compensator and method thereof comprising a polarization changer; a beam delay element; and a beam director, wherein the polarization changer receives an optical beam having a unit of group delay induced thereon by the beam delay element and induces a change in polarization of the optical beam prior to transmitting the optical beam to the beam director, the change in polarization inducing a path change on the optical beam by the beam director whereupon the optical beam is redirected to the beam delay element whereat a further unit of group delay is induced on the optical beam, wherein the beam director is a single polarizing beam splitter that is operatively coupled with a plurality of ninety degrees mirrors to facilitate inducement of at least four units of group delay on the optical beam, as recited in claims 1 and 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
